

Critical Career Readiness Skills: Position Statement

The Omaha community came together with a common goal to bridge the gap between crucial STEM workforce skills and education. Over 140 community members spanning 60 different organizations worked together to identify critical skills for 21st century jobs. They acknowledged the importance of multiple frameworks for these skills, such as the Nebraska Standards for Career Readiness.

The following skills were deemed the most critical to the needs of the community:

Problem Solving Skills

Effective Communication

Collaboration Skills

A product of the Omaha STEM Ecosystem facilitated Community Conversations - "Bridging the Gap"
